

From the
earth. To
the earth.

agriculture, nature
and food quality

Policy, research and international cooperation

Annette Wijering

Ministry of Economic Affairs, Agriculture and Innovation
Department of Knowledge and Innovation

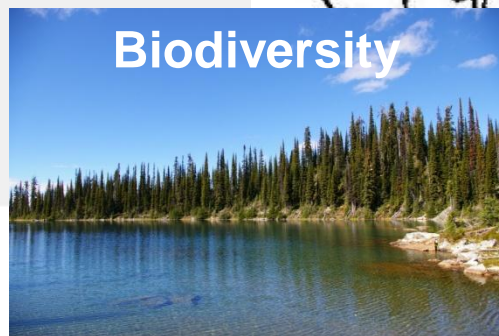

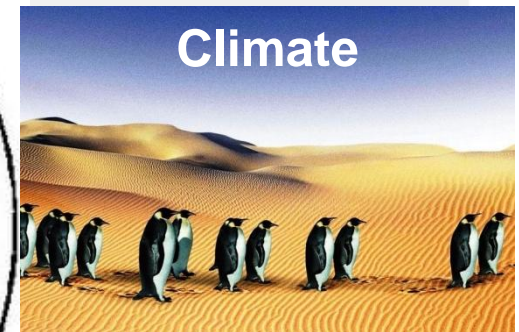

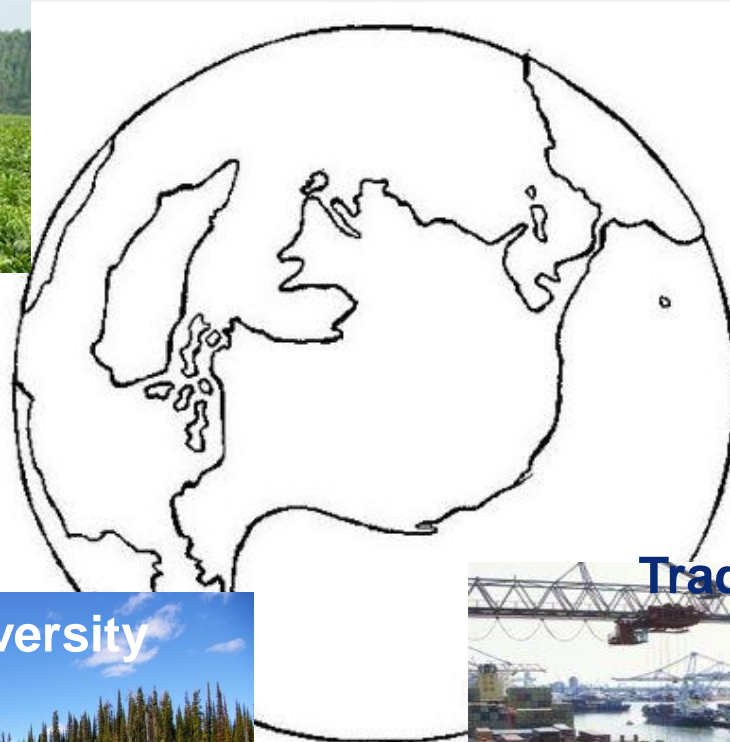

agriculture, nature
and food quality

Key questions

1. Contribution to MDG 1
2. Organization and structure of research
3. Cooperation with other stakeholders

Global challenges

Dutch policy for agriculture and development cooperation

Focus:

- Strengthening what NL are good at (agrofood, water)
- Investing in public private partnerships
- Reinforcing the role of knowledge and innovation to promote (sustainable) economic development

The golden triangle: government, research and the private sector

- Mutual benefit: cooperation is of prime importance for the 'green' domain
- Cooperation is needed for innovative developments

Good luck!
